

MATCH MANAGER

Match Manager is a program developed specially for score registration in shooting sports. It's a user-friendly competition program for organizations and shooting clubs.

Key features:

- Useful for all sorts of competitions including; liga, club, regional, national and international level.
- Setup and modify unlimited disciplines, categories and classes.
Easy setup available by templates.
- Specific settings for unlimited series and other prize competitions.
- Network possibilities; e.g. registration office, several target readers, display monitors.
- Can be connected to multiple external devices e.g. INTARSO, FrET, DISAG, SAM, RIKA.
- Automatically updated results shown on screen displays.

- Advertisement possibilities in the presentations.
- Export options e.g. live results on the internet, Excel, etc.
- Merging options with Microsoft Word; e.g. creation of start numbers.
- Statistics.
- Competition package options with one single click.

- Fast and easy manual score registration.
- Automatic team score results.
- Data is stored directly in a powerful database.
- Easy filtering and sorting of specific data.
- Useful and immediate help section.
- Multiple language support.

- Modifying options for the setup of the result list.
- Headers and footers are changeable on the result print.
- Shot pictures displayed per subseries on the result print.
- Statistics displayed for the shooters progress during the competition on the result print.

Match Manager is tested in practice and is meanwhile in use by many shooting clubs. It has also been used for score registration at both RIAC and InterShoot since 2007. The program is continuously in development and adapts to all ISSF score registration rules within pistol and rifle shooting.

Match Manager includes free updates for any new released subversions.
